Q: Errors in Project I had downloaded the sample project from this link Now I want to work in this project but I am facing some issues. It was compiled properly but running this project I am facing 2 errors. ERROR: xxx.obj : error LNK2005: __SendMessageW already defined in vc90.dll ERROR: xxx.obj : error LNK2005: __GetAsyncKeyState already defined in vc90.dll I have read that there is no way to build this project. But I want to get it done. Please help me. I am new to programming. A: You have to replace the code with the following code. #ifdef UNICODE #define _UNICODE #endif #define GetMessageW GetMessageW #define GetAsyncKeyState GetAsyncKeyState package com.github.zcoder.fipscheck; import com.github.zcoder.dataobject.IUser; import com.github.zcoder.dataobject.pojo.UserPOJO; import com.github.zcoder.dataobject.pojo.UserPOJOHibernate; import com.github.zcoder.mapper.GenericDao; import com.github.zcoder.model.UserDO; import com.github.zcoder.model.UserPO; import org.hibernate.validator.constraints.Email; import javax.persistence.*; import java.util.List; @MappedSuperclass public class BaseMapper { public static final String SINGULAR_TABLE_PREFIX = "_"; @Id @Column(name = "id") private long id; @Version @Column(name = "version") private int version; private String tableName; @Column(name = "name") private String name; 82157476af
