. the best "hindi" OCR program? are there any other programs or methods of doing OCR or I use Google's "Image Search/Text Recognition" function? I want to extract text from a pdf file without OCR-ing it. Only other option I can think of is to read it with PDF-Tran (I have a LOT of PDF files I have to go through) and then search for the relevant text in the text boxes that are already "saved. This works fine and I just want to automate it. Anyone know a solution for this? Thanks. . Graphic Designer/Freelance · 13 Job Postings and 130,577 applied for · 1 Previous post, last post A: Since these are more or less standard text files, you could use a Python solution. To get you started, here is a simple script: `#!/usr/bin/env python3 import numpy as np import sys if __name__ == "__main__": # Indentation and path to file to read from to be tweaked. inp_path = sys.argv[1] inp_ind = [0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12] x, y = np.loadtxt(inp_path, usecols=inp_ind, usecols=(0, 1)) # Numpys textconv module used to convert the matrix to text. y = textconv.textconv(y.flatten(), target='utf-8') # Print the results to stdout in readable format. sys.stdout.write(y) You can use this to convert all of the files in some directory to a single file. Next, here is a solution that uses another Python module, tesseract. #!/usr/bin/env python3 import numpy as np from tesseract import * # Indentation and path to file to read from to be tweaked. inp_path = sys.argv[1] inp_ind = [0, 1, 2 ba244e880a`
