"Ozone, air pollution and human health." ,. Ozone is an air pollutant that can react with NOx, VOCs and other gases to form secondary species that are associated with respiratory and cardiovascular morbidity and mortality. ,. Aug 16, 2556 BE This publication presents the results of a study of the behavior of temperature-dependent dielectric properties, principally the dielectric constant and the dielectric loss factor, of a large number of materials using the temperature- dependent measurements of Vlieg, Nelson and Ashby, who were the first to document the phenomenon of temperature-dependent relaxation in materials in 1947. Temperatures exceeding about 30 C or 86 F do not have a strong effect on the measured dielectric constant or loss factor values for most dielectric materials. , Jan 5, 2561 BE Raduga 1.9.7 is the music automation software for radio stations, clubs and shops.
